

jrn_hkPreview

By **Jesper Rosenlund Nielsen**

http://htmlkit.com/go/plugin/jrn_hkpreview

Latest Info:	Plugin page on the Web
Version:	1.1.0
Date Updated:	26-Mar-2001
Author:	Jesper Rosenlund Nielsen

Description

The hkPreview plugin resides in the Tools section of the action bar in HTML-Kit. There is a menu item for each of the browser in the browser list. When you run the plugin, the currently edited file is saved as a temporary file (named `_{{jrn_hkPreview}}_` plus the original file extension) in the same folder as the original file. The temporary file is then opened using the selected browser, using server mappings if you have defined any. I use this myself in a setup with an Apache webserver running on my local machine.

A tip: Define a keyboard shortcut to the action "Tools > Save tmp and preview" (I have used Alt+0 myself).

Requirements

- HTML-Kit Build 292 or 290

Download

- Address:

Common Questions

Q: How do I install jrn_hkPreview?

A: Download the "jrn_hkPreview" plugin. It's not necessary to unzip the *.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "OK."

If any additional prompts appear, follow them to complete the installation.

Q: How do I run it?

A: Tools

jrn_hkPreview's icon will appear on the "Tools" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Tools" sub menu.

Q: Whats' the quickest way to uninstall jrn_hkPreview?

A: Right click the jrn_hkPreview icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
