Latest Info:	Plugin page on the Web
Version:	Sep-2004
Date Updated:	27-Oct-2004
Author:	Dave Raggett
Company:	HTML Tidy Project

## Description

Updates HTML Tidy included in HTML-Kit to the September-2004 version of Tidy.

### Features:

- Suggests fixes and improvements for common errors found in HTML, XHTML and XML documents.
- Check multiple documents through the Batch Action Wizard.
- Ability to read settings from a default Tidy config file [new].
- Convert documents to XHTML and XML formats.
- Upgrade FONT tags to style sheets.
- Remove optional end tags.
- Indent / beautify tags, attributes and/or content.
- Change tags and/or attributes to uppercase or lowercase.
- Strip surplus tags in HTML documents generated using Word.
- Check for accessibility.
- Convert hex color values to color names.
- Convert I and B tags to EM and STRONG tags.
- Convert to numeric entities.
- Ability to specify different encoding methods for input and output using a config file [new].
- Wrap attribute values.

### Usage:

- To check for common HTML coding errors: open a HTML document and click the red broom icon on the Tools tab. The HTML code with any fixes suggested by Tidy will appear in the Output window. Warnings and error messages will appear in the Messages Window. Once the generated code is inspected, it can be copied back to the editor by right clicking the Output window and selecting "Copy Output to Editor".
- For more options: click the down arrow next to the red Tidy icon.
- To automatically read settings from a Tidy config file (instead of using the settings on the Tidy tab under Preferences): save Tidy configuration as Default.htc under the HTML-Kit\Data\Default\ folder. Invoke the Tidy plugin using its icon. The "Edit | Preferences | Tidy | Save Config" option can be used to save current Tidy settings to a Tidy config file.
- To check multiple documents: select "Tools | Batch Actions | Tidy" from the main menu.

## Requirements

- HTML-Kit Build 292

## Download

- Address:  
<http://htmlkit.com/go/plugin/htmltidy>
- Download size: 127.41 KB

## Common Questions

*Q: How do I install HTML Tidy?*

A: Download the "HTML Tidy" plugin. It's not necessary to unzip the \*.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded \*.zip file and click "OK."

If any additional prompts appear, follow them to

complete the installation.

*Q: How do I run it?*

A: Tools

HTML Tidy's icon will appear on the "Tools" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Tools" sub menu.

*Q: Whats' the quickest way to uninstall HTML Tidy?*

A: Right click the HTML Tidy icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

*Q: Do I need the exact versions of software listed under the Requirements?*

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

*Q: What's the best way to check which version of HTML-Kit I'm using?*

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
