Common Questions

Q: Which programming language was used to write it?

A: bbStripComments Source was written in HKPGen Definition. More plugins written in HKPGen Definition can be found on the Plugins page.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.

Q: What's this requirement for hkScript?

A: hkScript 290.1 requirement is only applicable to the users of the older HTML-Kit Build 290. Since the latest version of hkScript is already included in HTML-Kit Build 292, the users of Build 292 can ignore it.

*Q: What are *.hpd files?*

A: *.hpd files (HTML-Kit Plugin Definition files) are used to store information about plugins created using the Plugins Generator. They can be opened using the Plugin Generator's "File | Open" main menu option.
