

# gmPageLinks

By Gary Moore

<http://htmlkit.com/go/plugin/gmpagelinks>

Latest Info:	Plugin page on the Web
Version:	1.0
Date Updated:	24-May-2004
Author:	Gary Moore

## Description

Lists links and email contacts in the current document, a local HTML file, a remote web page or a comma-delimited file.

Features:

- Generates a report that contains links or email contacts,
- The source can be the current document in the editor, a HTML file on the local computer, a comma-delimited local file or a remote web page,
- Preferences dialog that can be used to customize the background color, page title, heading size and heading text of the report,
- Optionally include a report header and/or a footer,
- Ability to include style, link, base and specific meta tags,
- Remove commonly used escape character sequences in URLs,
- Option for including the page location in a comment tag, and
- Ability to convert relative URLs found in web pages to absolute URLs.

## Common Questions

*Q: How do I install gmPageLinks?*

A: Download the "gmPageLinks" plugin. It's not necessary to unzip the \*.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded \*.zip file and click "OK."

If any additional prompts appear, follow them to complete the installation.

*Q: How do I run it?*

A: PageReports  
gmPageLinks's icon will appear on the "PageReports" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | PageReports" sub menu.

*Q: Which programming language was used to write it?*

A: gmPageLinks was written in hkScript. More plugins written in hkScript can be found on the Plugins page.

*Q: Whats' the quickest way to uninstall gmPageLinks?*

A: Right click the gmPageLinks icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

*Q: Do I need the exact versions of software listed under the Requirements?*

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

*Q: What's the best way to check which version of HTML-Kit I'm using?*

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
