

JSP Local Reference

By Eric R. Glass

http://htmlkit.com/go/plugin/hkh_jsplocal

Latest Info:	Plugin page on the Web
Version:	1.0
Date Published:	05-Apr-2001
Author:	Eric R. Glass
Plugin Type:	Keyword Help File

Description

Adds keyword help support for offline/local JSP reference.

To install the local JSP reference files:

- Create a folder for storing the JSP help files, such as C:\JSPHelp\ (the ItemPrefix option in the *.hkh file must be updated if using a different folder),
- Create the sub folders servlet\2.2\javadoc inside the C:\JSPHelp\ folder,
- Download ? to the new folder, but don't extract the *.zip file at this point,
- Extract files in the servlet-2_2-doc.zip file into the C:\JSPHelp\servlet\2.2\javadoc\ folder (make sure that "Use folder names" or similar option is checked when extracting the *.zip file to preserve the directory structure),
- The following folders should now appear under C : \ J S P H e l p \ :C:\JSPHelp\servlet\2.2\javadoc\javaxC:\JSPHelp\servlet\2.2\javadoc\javax\servletC:\JSPHelp\servlet\2.2\javadoc\javax\servlet\httpC:\JSPHelp\servlet\2.2\javadoc\javax\servlet\jsp, and
- Download ? and extract to the C:\JSPHelp\jsp\tags\11\ folder.

Usage:

- Once the keyword help plugin and the JSP reference files are installed, place the cursor on a JSP keyword and press F1 to lookup help.

Requirements

- HTML-Kit Build 292 or 290

Common Questions

Q: How do I install JSP Local Reference?

A: Download the "JSP Local Reference" keyword help file. It's not necessary to unzip the *.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Keyword Help File" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "OK."

To test the installation: place the cursor on one of the supported keywords and press the F1 key.

Q: How do I use it?

A: Place the cursor on one of the keywords covered by it and press the F1 key. A context-sensitive help window will appear with the help content or any additional references.

Q: How can the "JSP Local Reference" related help items be disabled?

A: Open the Preferences dialog using the "Edit | Preferences" main menu option and change to the "Help" tab. Uncheck the help file in question from the "Keyword help files" list.

Q: How do I create or modify a keyword help reference?

A: Details on how to create keyword help files can be found in the support documents section.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
