

ksLinesToList

By **Kay Stenschke**

<http://htmlkit.com/go/plugin/kslinestolist>

Version:	1.0
Date Published:	13-Dec-2005
Author:	Kay Stenschke

Description

Converts the selected lines to a comma separated single line.

Features:

- Converts the selected lines to a comma separated single line.
- Removes empty lines and double commas.
- Converted text is displayed in the Output window for quick examination before use.

Usage:

- To convert multiple lines to a comma separated line: select the lines that should be included in the converted line and invoke the plugin. The result will appear in the Output window. Copy the text from the Output window and paste in the Editor window.

Requirements

- HTML-Kit Build 292

Common Questions

Q: How do I install ksLinesToList?

A: Download the "ksLinesToList" plugin and save it to a folder of your choice (for example, c:\webfiles\). It's not necessary to manually extract the *.zip file, HTML-Kit will expand it to the proper folder during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "Open."

If any additional prompts appear, follow them to complete the installation.

Q: How do I run it?

A: Text

ksLinesToList's icon will appear on the "Text" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Text" sub menu.

Q: Which programming language was used to write it?

A: ksLinesToList was written in JavaScript. More plugins written in JavaScript can be found on the Plugins page.

Q: Whats' the quickest way to uninstall ksLinesToList?

A: Right click the ksLinesToList icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
