## Common Questions

*Q: Which programming language was used to write it?*

A: mmSVG Plugin Definition was written in HKPGen Definition. More plugins written in HKPGen Definition can be found on the Plugins page.

*Q: Do I need the exact versions of software listed under the Requirements?*

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

*Q: What's the best way to check which version of HTML-Kit I'm using?*

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.

*Q: What's this requirement for hkScript?*

A: hkScript 290.1 requirement is only applicable to the

users of the older HTML-Kit Build 290. Since the latest version of hkScript is already included in HTML-Kit Build 292, the users of Build 292 can ignore it.
