

# XML Validator

<http://htmlkit.com/go/plugin/hkxmlv>

Latest Info:	Plugin page on the Web
Version:	1.5
Date Updated:	30-Mar-2002
Author:	HTML-Kit Support

## Description

Validates one or more files using the DTD or the well-formedness checks.

### Features:

- Validates XML / XHTML documents using the document type definition (DTD),
- Checks for well-formedness (with or without a DTD),
- Displays warnings and errors in the Messages Window with line numbers, and
- Supports validating multiple files using the Batch Action Wizard.

### Usage:

- To validate the current document, click the plugin icon or select one of its drop-down menu items,
- To jump to the source of any errors, double click the message in the Messages Window, and
- To validate multiple files, invoke the plugin using the "Tools | Batch Actions" menu.

## Requirements

- HTML-Kit Build 292 or 290

## Download

## Common Questions

*Q: How do I install XML Validator?*

A: Download the "XML Validator" plugin. It's not necessary to unzip the \*.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded \*.zip file and click "OK."

If any additional prompts appear, follow them to complete the installation.

*Q: How do I run it?*

A: Tools

XML Validator's icon will appear on the "Tools" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Tools" sub menu.

*Q: What's the quickest way to uninstall XML Validator?*

A: Right click the XML Validator icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

*Q: Do I need the exact versions of software listed under the Requirements?*

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

*Q: What's the best way to check which version of HTML-Kit I'm using?*

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
