## Common Questions

*Q: How do I install avwJSImageRotator?*

A: Download the "avwJSImageRotator" plugin and save it to a folder of your choice (for example, c:\webfiles\). It's not necessary to manually extract the \*.zip file, HTML-Kit will expand it to the proper folder during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded \*.zip file and click "Open."

If any additional prompts appear, follow them to complete the installation.

*Q: How do I run it?*

A: avwTools  
avwJSImageRotator's icon will appear on the "avwTools" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | avwTools" sub menu.

*Q: Which programming language was used to write it?*

A: avwJSImageRotator was written in hkScript. More plugins written in hkScript can be found on the Plugins page.

*Q: Whats' the quickest way to uninstall avwJSImageRotator?*

A: Right click the avwJSImageRotator icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

*Q: Do I need the exact versions of software listed under the Requirements?*

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

*Q: What's the best way to check which version of HTML*

*-Kit I'm using?*

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
