

hkScreenshot

<http://htmlkit.com/go/plugin/hkscreenshot>

Version:	0.91
Date Published:	16-Jan-2006
Author:	HTML-Kit Support

Description

Adds the ability to take screenshots of the HTML-Kit desktop.

Features:

- Adds the ability to quickly take screenshots of the application window that contain editor and preview windows.
- Provides options for saving the screenshot to the clipboard or to a file.
- The timer function can be used to take a screenshot after a several seconds of delay. The delay can be used to prepare any menus or popup windows for the screenshot.
- When working on websites for clients, the screenshots can be used as a way to show progress (instead of sending the HTML pages that are still under construction).

Usage:

- To take a screenshot: invoke the plugin and hover over the buttons on it. Click one of the buttons to take a screenshot.

Requirements

- HTML-Kit Build 292
- .NET Framework 1.1

Common Questions

Q: How do I install hkScreenshot?

A: Download the "hkScreenshot" plugin and save it to a folder of your choice (for example, c:\webfiles\). It's not necessary to manually extract the *.zip file, HTML-Kit will expand it to the proper folder during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "Open."

If any additional prompts appear, follow them to complete the installation.

Q: How do I run it?

A: Tools

hkScreenshot's icon will appear on the "Tools" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Tools" sub menu.

Q: Whats' the quickest way to uninstall hkScreenshot?

A: Right click the hkScreenshot icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.

Q: Is it necessary to install the .NET Framework and how do I get it?

A: Please visit the .NET Framework information page for details.
