

HTMLRef Reference

By Gary Moore

http://htmlkit.com/go/plugin/hkh_htmlref

Latest Info:	Plugin page on the Web
Version:	1.0
Date Updated:	01-Oct-2000
Author:	Gary Moore
Plugin Type:	Keyword Help File

Description

Adds support for using the `htmlref.chm` file to lookup help for HTML tags, attributes, values and CSS properties.

Notes:

- The `htmlref.chm` file (distributed with some versions of Internet Explorer and certain Microsoft products) must already exist on the system before this keyword help file can be used to link to it.

Requirements

- HTML-Kit Build 292 or 290
- HTMLRef.chm

Download

- Address:
http://htmlkit.com/go/plugin/hkh_htmlref
- Download size: 3.23 KB

Common Questions

Q: How do I install HTMLRef Reference?

A: Download the "HTMLRef Reference" keyword help file. It's not necessary to unzip the *.zip file, HTML-Kit will expand it to the appropriate directory during the

installation.

Select "Install | Keyword Help File" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "OK."

To test the installation: place the cursor on one of the supported keywords and press the F1 key.

Q: How do I use it?

A: Place the cursor on one of the keywords covered by it and press the F1 key. A context-sensitive help window will appear with the help content or any additional references.

Q: How can the "HTMLRef Reference" related help items be disabled?

A: Open the Preferences dialog using the "Edit | Preferences" main menu option and change to the "Help" tab. Uncheck the help file in question from the "Keyword help files" list.

Q: How do I create or modify a keyword help reference?

A: Details on how to create keyword help files can be found in the support documents section.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
