    | </r>  
    | </data>
```

Latest Info:	Plugin page on the Web
Version:	0.91
Date Updated:	29-May-2001
Author:	HTML-Kit Support

## Description

Imports CSV file data as XML tags.

Features:

- Imports data from Comma Separated Value ("CSV") files as XML tags.
- Can be used to load plain data from applications that support CSV files, including Access, dBase and Excel.

Usage:

- To import data from a CSV file: invoke the plugin and select the \*.csv input file. Click OK to generate the XML tags. The folder icon can be used to pick a file using the File Open dialog.
- To import CSV data into a existing document: open the target document, place the cursor where the new data should be inserted and invoke the plugin.

## Requirements

- HTML-Kit Build 292 or 290
- If using Build 290, hkScript 290.1

## Common Questions

*Q: How do I install hkCSV2XML?*

A: Download the "hkCSV2XML" plugin. It's not necessary to unzip the \*.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded \*.zip file and click "OK."

If any additional prompts appear, follow them to complete the installation.

*Q: How do I run it?*

A: Tools

hkCSV2XML's icon will appear on the "Tools" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Tools" sub menu.

*Q: Which programming language was used to write it?*

A: hkCSV2XML was written in hkScript. More plugins written in hkScript can be found on the Plugins page.

*Q: Whats' the quickest way to uninstall hkCSV2XML?*

A: Right click the hkCSV2XML icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

*Q: Do I need the exact versions of software listed under the Requirements?*

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

*Q: What's the best way to check which version of HTML-Kit I'm using?*

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.

*Q: What's this requirement for hkScript?*

A: hkScript 290.1 requirement is only applicable to the users of the older HTML-Kit Build 290. Since the latest version of hkScript is already included in HTML-Kit Build 292, the users of Build 292 can ignore it.
