

bbStripComments

By **Bill Borum**

<http://htmlkit.com/go/plugin/bbstripcomments>

Latest Info:	Plugin page on the Web
Version:	1.1
Date Updated:	09-Nov-2002
Author:	Bill Borum

Description

Adds options for removing the three most common types of comments found in HTML/CSS documents: , /* C/CSS style comments */ and // line comments. Optionally the comment tokens can be removed without removing the comment text.

Note: this plugin will not remove C/CSS style comments containing "*" characters such as /* *text* */ and HTML comments containing "-" characters such as . CTRL+Z can restore the document to its original text.

Requirements

- HTML-Kit Build 292 or 290
- If using Build 290, hkScript 290.1

Common Questions

Q: How do I install bbStripComments?

A: Download the "bbStripComments" plugin. It's not necessary to unzip the *.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "OK."

If any additional prompts appear, follow them to complete the installation.

Q: How do I run it?

A: Text

bbStripComments's icon will appear on the "Text" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | Text" sub menu.

Q: Which programming language was used to write it?

A: bbStripComments was written in hkScript. More plugins written in hkScript can be found on the Plugins page.

Q: Whats' the quickest way to uninstall bbStripComments?

A: Right click the bbStripComments icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.

Q: What's this requirement for hkScript?

A: hkScript 290.1 requirement is only applicable to the users of the older HTML-Kit Build 290. Since the latest version of hkScript is already included in HTML-Kit Build 292, the users of Build 292 can ignore it.
