Latest Info:	Plugin page on the Web
Version:	0.90
Date Published:	27-Sep-2003
Author:	HTML-Kit Support
Audience:	Plugin Developers
Written In:	hkScript

Description

Demonstrates how to look for text fragments using regular expressions and list the matches in a drop-down list that can be used to jump to the location of the found text.

Demonstrates How To:

- Collect text fragments with location information from the current editor using regular expressions,
- Reduce processing time by checking if the text being scanned has changed since the last session,
- Associate information with drop-down list items which only the plugin can access, and
- Go to the location of the item picked from the drop-down list and leave several line above and below it.

Requirements

- HTML-Kit Build 292

Common Questions

Q: How do I install demoListMatches?

A: Download the "demoListMatches" plugin. It's not necessary to unzip the *.zip file, HTML-Kit will expand it to the appropriate directory during the installation.

Select "Install | Install Plugin" from HTML-Kit's "Tools" menu. Point to the downloaded *.zip file and click "OK."

If any additional prompts appear, follow them to

complete the installation.

Q: How do I run it?

A: hkpDemos

demoListMatches's icon will appear on the "hkpDemos" tab on HTML-Kit's Actions Bar. It can also be invoked from the "Actions | hkpDemos" sub menu.

Q: Which programming language was used to write it?

A: demoListMatches was written in hkScript. More plugins written in hkScript can be found on the Plugins page.

Q: Whats' the quickest way to uninstall demoListMatches?

A: Right click the demoListMatches icon on the Actions Bar and select "Uninstall." Alternatively, the "Tools | Install | Uninstall Plugins" menu option in HTML-Kit can be used to uninstall this and other plugins.

Q: Do I need the exact versions of software listed under the Requirements?

A: The versions listed are the minimum versions required by this plugin. For example, a plugin that requires HTML-Kit Build 290 will run on HTML-Kit Build 292 as well.

Q: What's the best way to check which version of HTML-Kit I'm using?

A: The build number can be found on the "About" dialog, which is located on HTML-Kit's "Help" menu.
